Product Code

AR - 210 - H R - J - A

Ø210mm

Table Diameter

Ø255mm

Special Version (A, B, C,...)
Specified by Customers

Worm & Gear material

Refer to page2 Table1

J High Tensile Brass

T Aluminum Bronze

Alternative Hydraulic Brake

Except for AR-255H
Refer to page2 Table3

Motor mounting location

Refer to page2 Table2

R Right Mount

B Back Mount

L Left Mount

N Right Mount

with sheet metal cover reduction

Model Code (by Transmission Mechanism)

AR HR Series

Worm & Worm Gear

Specially designed double-lead worm & gear with full-depth teeth. The worm gear with a large pitch diameter creates a large engagement area and less pressure on the contact surface, resulting in higher strength. By moving the worm shaft axially, the tooth engagement can be changed successively. As the backlash between worm and gear can be adjusted while keeping them in their proper positions, the ideal tooth engagement is maintained.

RC Series

Roller Gear Cam

It consists of an input shaft and output turret with embedded roller followers. A cross-roller bearing supports the output turret with minimal run out and transmits power by rolling rather than sliding. Preloaded roller followers contact the input rib surfaces with a wedge-shaped cross section. It can be adjusted by moving the input axis, eliminating backlash completely. Clearly seen for CW and CCW rotation.

AD Series

Direct Drive Motor

There is no mechanical transmission (reduction) mechanism such as worm gear or roller cam system in a rotary table equipped with a D.D. (Direct Drive) motor. The torque (Direct Drive) motor is built in the rotary table to drive directly. High rotation speed and high acceleration / deceleration can be achieved. Besides, a built-in rotary encoder is employed to secure high positioning and repeatability.

*1: The faceplate can be enlarged to Ø250 as an option.
 *2: When the faceplate is enlarged to Ø250 and motor mount location is LEFT or RIGHT.
 *3: When the faceplate is Ø210 and motor mount location is BACK.
 *4: When the faceplate is enlarged to Ø250 and motor mount location is BACK.
 *5: Valid when it is below the rated speed.

Ø210mm Model Dimensions

RC-210R

RC-210L

AR-210R

(): When the faceplate is enlarged to Ø250mm.

AR-210L

(): When the faceplate is enlarged to Ø250mm.

AR-210B

(): When the faceplate is enlarged to Ø250mm.

*1: The Guide Key size can be changed based on the T-slot of work table.

★ Air purge function is provided inside the motor cover as standard.

★ External dimensions depend on the type of the servo motor. Indicated dimensions are in case of FANUC. Please contact us for CAD files.
